

**OMNICOLOR™  
MULTIPURPOSE  
COLORANTS**

**The industry's first effective  
line of multipurpose colorants,  
Omnicolor™ offers excellent  
color performance across the  
broadest range of polymers,  
while helping to minimize costs.**

# OMNICOLOR™ MULTIPURPOSE COLORANTS

Omnicolor delivers consistently brilliant batch-to-batch color with exceptional reliability and quality. The low usage rate, low minimum order quantities, and pelletized form for easy handling and storage make it a versatile and cost-effective choice. Using Omnicolor can help reduce net working capital by cutting inventory costs.

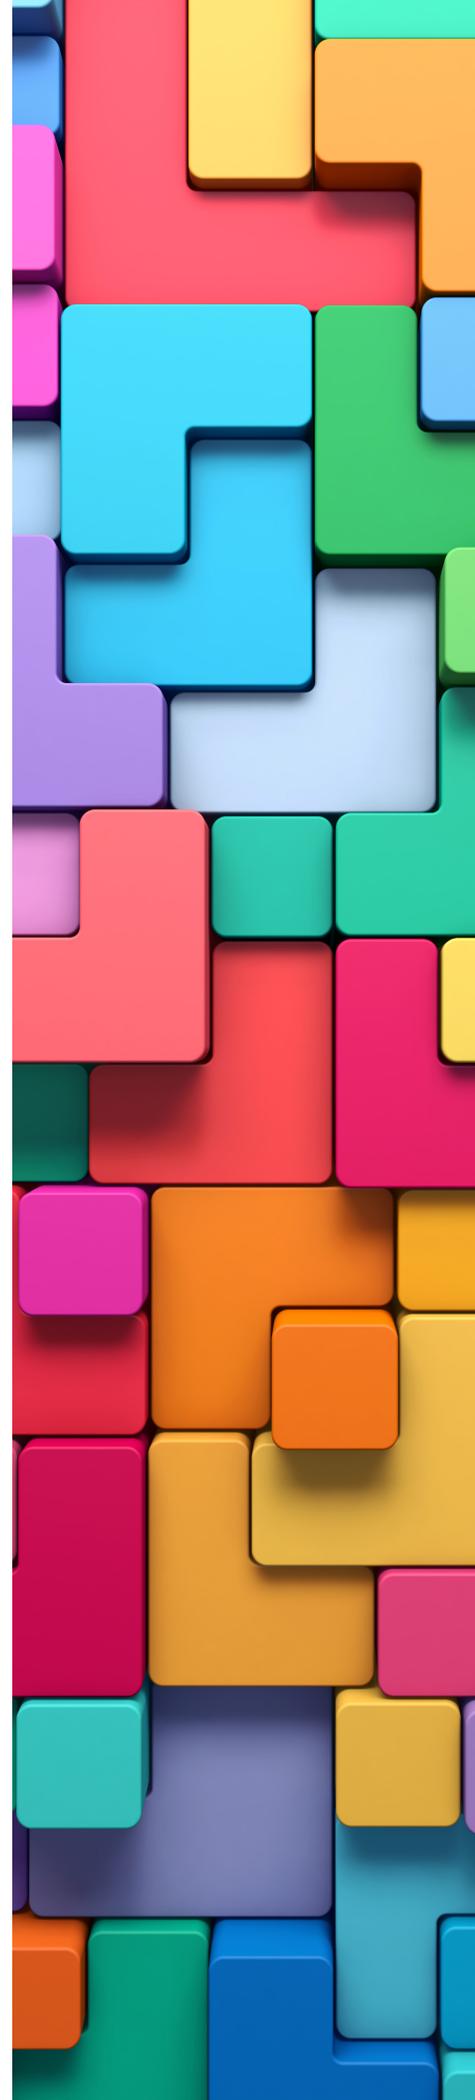

Available in a wide range of stock and standard colors, Omnicolor colorants are suitable for use with over 25 different polymers, including PVC, nylon and ABS. They are compatible with most common additives, including UV stabilizers, antistats and slip agents. All Omnicolor colorants are heavy metal-free and cadmium-free.

Omnicolor colorants are based on a multipurpose compatible carrier system. They are suitable for use with a wide range of polymers at the addition rates recommended in the table below:

## RECOMMENDED ADDITION RATES

|                   |      |                 |      |
|-------------------|------|-----------------|------|
| Polyethylene      | 1%   | Acetal          | 1%   |
| Polypropylene     | 1%   | SAN             | 1%   |
| GP Polystyrene    | 1%   | ABS             | 1–3% |
| HI Polystyrene    | 1–2% | PVC             | 1–3% |
| Acrylics (Opaque) | 1%   | Polycarbonate   | 1%   |
| PBT Polyester     | 1%   | Thermoplastic   | 1–3% |
| PET Polyester     | 1%   | Alloys & Blends | 1–3% |
| Polyurethane      | 1–2% | EVA             | 1%   |
| Polyamide (Nylon) | 1%   | Filled Polymers | 1–3% |

These low let-down ratios effectively reduce the overall cost to color.

# OMNICOLOR™ PROCESSING INFORMATION

## CONCENTRATE SELECTION

Omnicolor colorants are generally selected because of their versatility where a wide range of polymers are processed and their availability for sale in small quantities.

## UTILIZATION OF OMNICOLOR BLENDING

Thorough premixing of Omnicolor and the polymer is required to obtain color consistency throughout the production run. This can be achieved by tumble mixing or by the use of concentrate metering devices.

## PROCESSING

It is very important that the processing machine has good plasticizing capability. Improvements can often be achieved by making the following adjustments:

1. Increasing the back pressure
2. Reducing the screw speed
3. Raising the temperature in the middle zone of the barrel
4. Cooling the feed zone of the barrel to prevent premature melting of the the concentrate

## THERMAL STABILITY

Omnicolor processing temperatures pertain to the colorant system only. The carrier system also has a thermal ceiling and is dependent on both time and temperature. Care should be used when processing Omnicolor where melt temperatures may exceed 600°F (316°C).

## GENERAL INFORMATION ON OMNICOLOR CARRIER

The term ‘multipurpose colorant’ implies that the colorant carrier is compatible with most polymers. The carrier resin could cause performance problems in a few polymers. Therefore, Omnicolor should not be used in:

1. Cellulosic polymers
2. Transparent acrylic colors

## PIGMENT COMPATIBILITY

The Omnicolor range has been formulated with high quality, heavy metal-free pigments that perform well in a wide range of polymers under most processing conditions.

## MEDICAL, FOOD AND TOY REGULATIONS

Omnicolor colorants have limited EU food contact compliance, and are not suitable for FDA primary pharmaceutical packaging, cosmetic or medical applications. It is highly recommended to check with suppliers before using any Omnicolor masterbatch for food contact applications. Detailed statements relating to compliance with EU or US legislation and regulatory standards are available upon request.

## PROCESS COMPATIBILITY

Omnicolor colorants can be used for injection molding, blow molding, and profile and sheet extrusion. They will withstand the drying temperatures of most polymers that require drying before processing, such as ABS and nylon. For polymer drying in excess of 225°F (107°C), add the colorant after the drying process, or alternatively contact Avient’s technical staff for availability of high-temperature grades.

## LIGHTFASTNESS

This is measured on the Blue Wool Scale (BWS) from a minimum of 1 to a maximum of 8. Omnicolor offers a broad spectrum of colors with lightfastness ratings to suit most applications. Omnicolor colorants do not contain UV stabilizers; outdoor applications must be reviewed on a case-by-case basis. Consult with the Avient technical department when colorant is required for a light-specific or light-critical application.

## WEATHERABILITY

This refers to loss of color and outdoor exposure due to elemental action. Good lightfastness does not always indicate good weatherability. If weatherability is of prime importance, this should be specified.

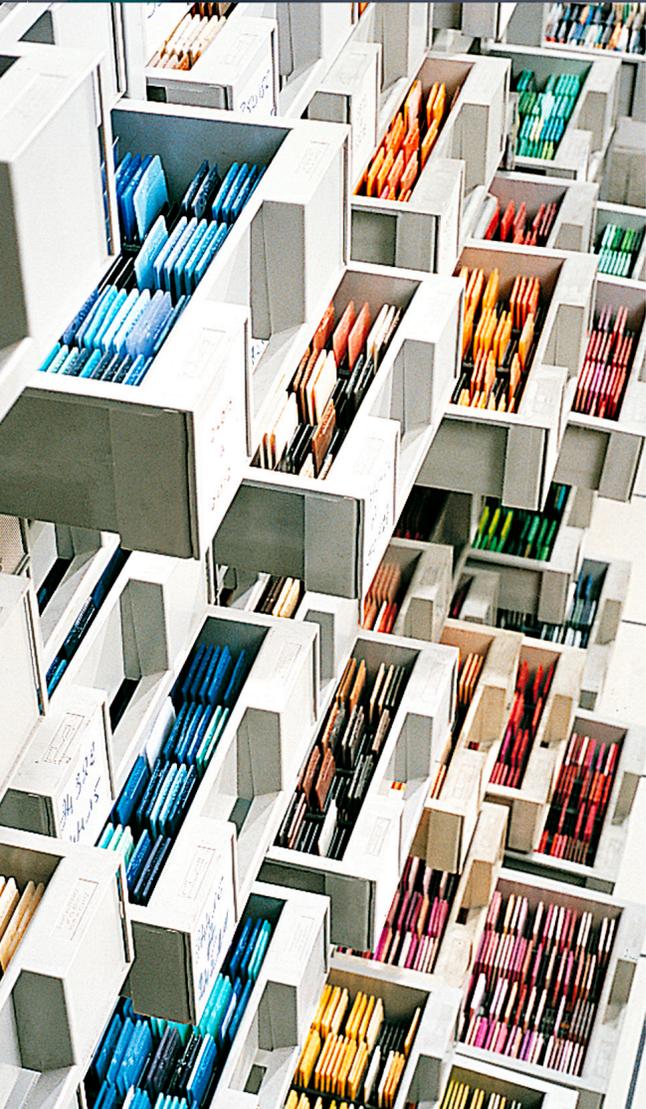

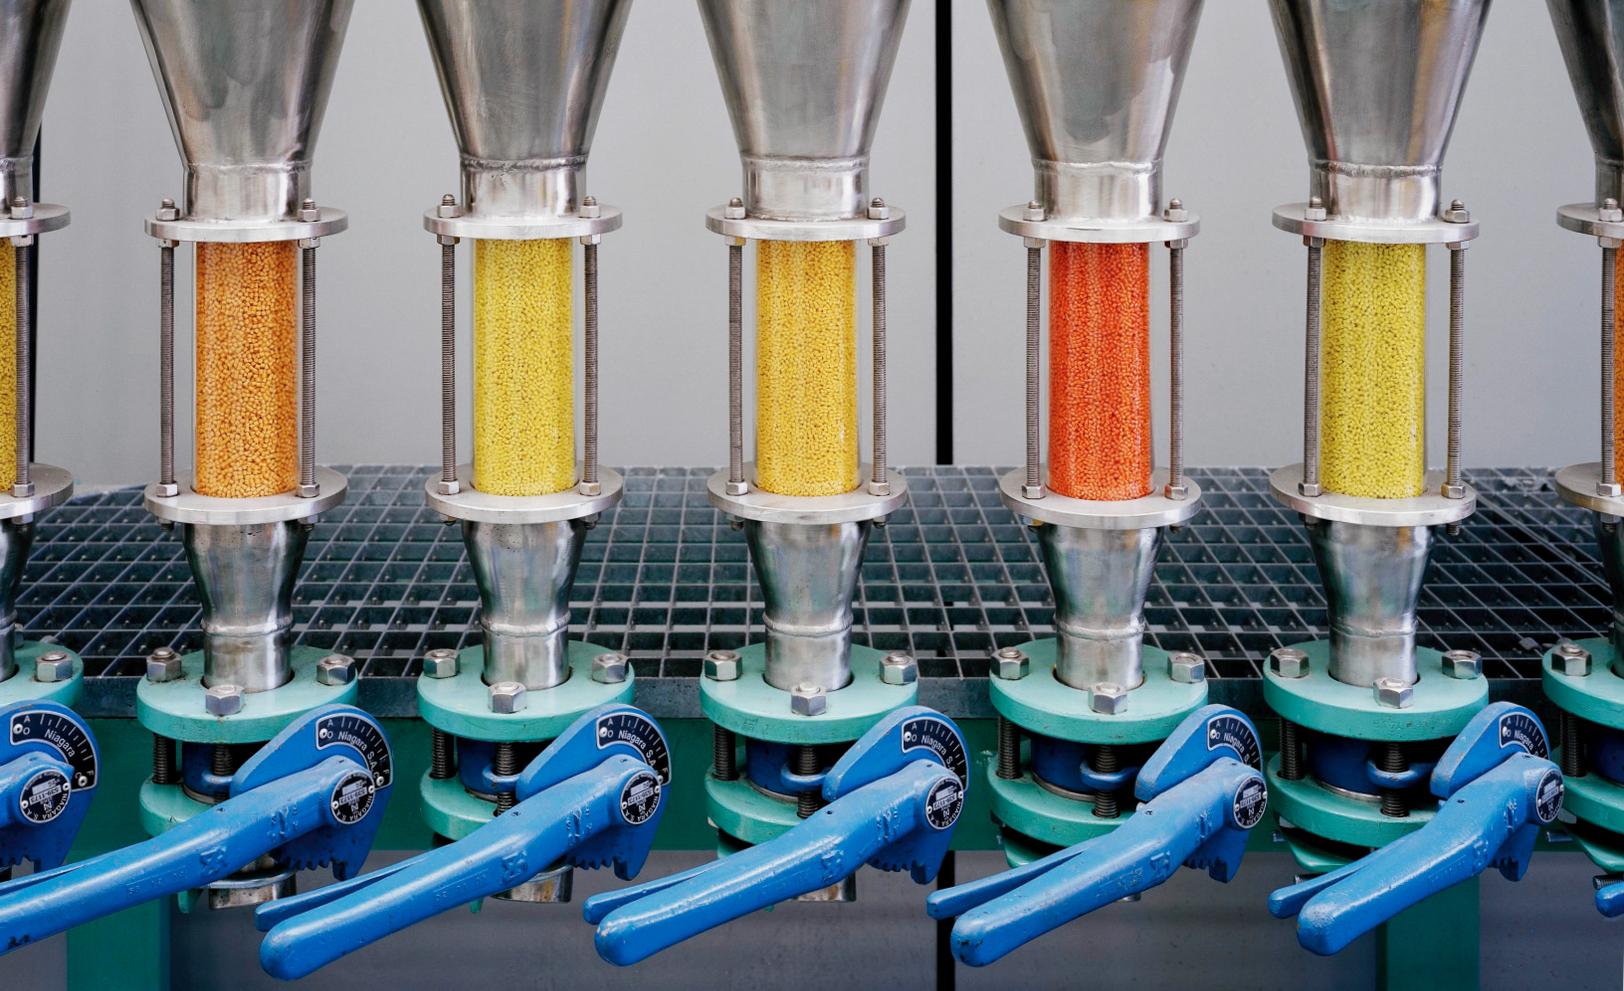

## COLOR SHADE AND OPACITY

All pigments vary in color strength and opacity. The formulations used to create Omnicolor combine the high tinting strength of organic pigments with the opacity of inorganics. The hiding power of the formulations does differ, and should be tested in all opaque and filled polymers before starting production. Actual color may vary depending on specific resin and processing conditions.

## FLAME RETARDANT POLYMERS

It is possible to use Omnicolor in flame retardant materials, but due to their high additive content only a limited range of colors such as gray or beige is possible. The addition of pigment and carrier could also affect the UL rating. Therefore, Omnicolor is not recommended for use in any UL applications.

# OMNICOLOR™ ORDERING INFORMATION

In the US and UK, Omnicolor stock and standard colors are available with quick turnaround. Low minimum order quantities are consistently available for both stock and non-stock colors—contact your local Avient representative for details.

Free 3.5 oz. (100 gm) samples are available on request.

## TWO WAYS TO CALCULATE COLORING COSTS

### Calculate using Let Down Ratio:

$$\frac{\text{Cost/lb of Concentrate} - \text{Cost/lb of Resin}}{\text{Let Down Ratio} + 1} = \text{Coloring Cost}$$

### Calculate using Let Down Percentage:

$$\text{Cost/lb of Concentrate} \times (\text{Let Down Percentage}/100) = \text{Coloring Cost}$$

# OMNICOLOR™ TROUBLESHOOTING

| SYMPTOM   | CAUSE  | REMEDY  |
|---|--|---|
| <b>Color Variation Shot-to-Shot</b>   | Poor Omnicolor preblending<br>Pigment has insufficient thermal stability | More thorough blending<br>Ensure correct machine temperature control              |
| <b>Screw Slip</b>   | Premature melting of Omnicolor<br>Excessive addition rate                | Reduce heat in feed zone<br>Check addition rate and reduce if necessary           |
| <b>Overall Good Distributive Mixing With Streaks or Dots of Another Color</b> | Poor pigment dispersion in concentrate                                   | Return concentrate for replacement  |
| <b>Black Streaks or Splotches</b>   | Degraded polymer in barrel   | Clean screw and barrel  |
| <b>Poor Distributive Mixing (Streaking)</b>                                   | Insufficient plastification  | See processing instructions   |
| <b>Loss of Color</b>  | Pigment has insufficient thermal stability                               | Change to more heat stable colorant<br>Ensure correct machine temperature control |

**AVIENT IS A PREMIER PROVIDER** of specialized and sustainable material solutions and services that transform customer challenges into opportunities. The range of world-class services includes:

**COLOR TECHNOLOGY**

Custom matching, saturated colors & special effects to fill market niches and eliminate secondary operations.

**COLOR AND DESIGN SERVICES**

Trend and color insights, and product development assistance to optimize design and gain speed to market.

**REGULATORY COORDINATION**

Aid with new product approvals to reduce regulatory overhead and minimize risk.

**FIELD TECHNICAL SERVICE**

Support for tool design, startup and production optimization to gain manufacturing efficiencies.

**SUSTAINABILITY**

Innovative materials and solutions to help you meet your sustainability goals.
